

Electric Vehicle Handling Qualified

How can you let your customers, community and business partners know you have made the investment in the tools and training necessary to properly receive EV's after a collision?

Becoming EVHQ - Electric Vehicle Handling Qualified provides recognition that you have the facility, equipment, tooling and understanding of what is needed to safely handle High-Voltage Vehicles.

The EVHQ – Electric Vehicle Handling Qualified program – has been developed by industry experts to identify, qualify and promote EV Ready collision centres across North America. The EVHQ program provides shops with the information and training to help their staff to understand the dangers and have the process and tooling recommended to handle EV's at their facility. It also provides consumers and insurers an easy way to find a collision centre that has demonstrated they are prepared to safely handle Electric Vehicles after a collision.

Marketing benefits

Receive official EVHQ | Electric Vehicle Handling Qualification!

Upon completion, your facility will be officially designated as a "EVHQ |Electric Vehicle Handling Qualified" facility and be able to access exclusive EVHQ marketing tools and signage.
